

Field Trial Summary

ULTRA HUMIC Improving Soil Structure
(Soil Type: Brown Black Clay)

ULTIMATE
AGRI-PRODUCTS

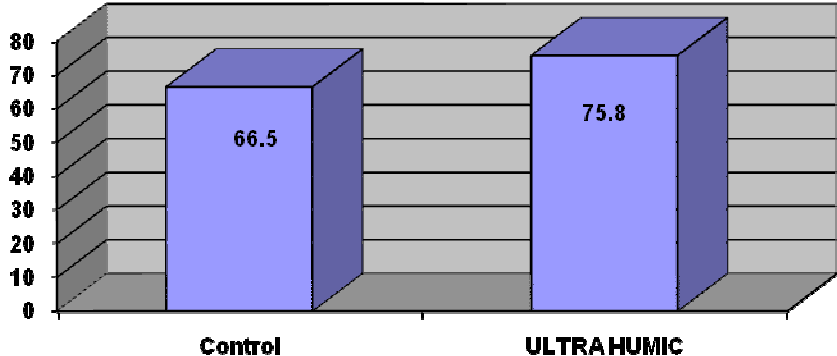

Field Trial Summary

Town: Hillston
State: New South Wales
Crop: Potatoes
Soil Type: Heavy silt clay
Irrigation Type: Centre Pivot
Application Rate: 5 Lt / hectare
Application Method: Boom Spray
Sample Depth: 0-30 cm

Stability Percentage
(Soil Structure)

60% = Non friable soil
80% = Fully friable soil

Conclusion: ULTRA HUMIC had shown a big increase in improving the soil structure allowing better root growth and improved water penetration.
